What is CSS ?

CSS (Cascading Style Sheets) is a stylesheet language used to describe the look and formatting of a document written in HTML. It is used to define the styles of elements on a web page, such as the font, color, size, and layout of text and other elements.

The main features of CSS are:

1. Styling
2. Responsive design
3. Separation of content and appearance
4. Reusability
5. Animations

There are a number of benefits of CSS, including:

1. Faster Page Speed
2. Better User Experience
3. Quicker Development Time
4. Easy Formatting Changes
5. Compatibility Across Devices

Learning CSS can open up a wide range of career opportunities in the field of web development and design, as CSS is an essential tool for creating visually appealing and consistent websites and web applications.
