

Table and its Properties

List of concepts involved :

1. HTML Table
2. Properties of table

HTML Table :

- Web developers can organize information like text, images, links, and other data into rows and columns of cells using HTML tables.
- The `<table>` tag is used to generate HTML tables. T
- Table rows are created using the `<tr>` tag, while data cells are created using the `td>` tag. Regular elements beneath `<td>` are by default left aligned.

1,1	1,2
2,1	2,2

Properties of tables :

- Table Heading
- Cell padding and spacing
- Colspan and rowspan
- Table Background
- Table height and width
- Table caption
- Table Header, Body and footer

Table Heading

Name	Batch
ABC	Full Stack

Cell padding and spacing

Name	Bacth
Rohan	Web development
Shaheen	Full Stack
