Making Account on Github and LinkedIn

Lecture Checklist

- Introduction to GitHub.

- Steps to create account on GitHub.

- Introduction to LinkedIn.

- Steps to create an account on LinkedIn.

GitHub

GitHub is a website and cloud-based service that provides a platform for developers to store and manage their code repositories, track changes, and collaborate on software projects.

Steps to create an account on GitHub

- Go to the GitHub website (https://github.com/).

- Click on the "Sign up" button in the top right corner of the page.

- Fill out the form with your personal information, including your name, email address, and password.

- Choose a free plan that fits our needs. GitHub offers both free and paid plans.

- Click on the "Create an account" button to finish creating your account.

- Verify your email address by clicking on the link in the verification email sent to you by GitHub.

- Once your account has been created and your email address has been verified, you can start using GitHub to store and manage your code repositories.

LinkedIn

LinkedIn is a professional networking website that allows users to create a profile, connect with other professionals in their industry, and find job opportunities.

Steps to create an account on LinkedIn

- Go to the LinkedIn website (https://www.linkedin.com/).

- Click on the "Join now" button in the top right corner of the page.

- Fill out the form with your personal information, including your name, email address, and password.

- Click on the "Agree & Join" button to finish creating your account.

- Verify your email address by clicking on the link in the verification email sent to you by LinkedIn.

- Once your account has been created and your email address has been verified, you can start building your LinkedIn profile by adding information about your work experience, education, skills, and professional interests.
